

DIAGNOSTIC SERVICES

SUPPORTING FAMILIES EVERY STEP OF THE WAY

At AST, our goal is to provide our community with supportive and effective services of the highest quality. To further this effort, we are now offering comprehensive psychological evaluations for children from birth through adolescence (age 16).

A comprehensive psychological assessment evaluates thinking, learning, and behavior and provides valuable insights into your child's behaviors, skills and thought processes. This is the first step in understanding how your child perceives and understands his or her environment and helps us determine areas of strength and identify skills that should be targeted for intervention.

AST's psychological evaluations are conducted in our Play and Learn Clinics by Licensed Psychologists.

The benefits of these evaluations include:

- Obtaining a clear understanding of your child's cognitive, psychological, developmental, and emotional functioning including an assessment of his or her strengths
- Developing an individualized treatment plan for unique or complex symptoms
- Ensuring effective treatment through time-sensitive referrals to appropriate services
- Measuring progress over time
- Providing information with consent to school districts, insurance companies, or regional centers to help facilitate services

Every day counts! Get your child on the right path. Call 1-866-AST-1520 to inquire about a psychological evaluation and other diagnostic services.
